

*Hamatolenus (Myopsolenus) staminops* Jell & Adrain, 2001 (TH272)

**Myopsolenus** → Ptychopariida → Ptychopariina → Ellipsocephaloidea → Ellipsocephalidae (old classification)  
Redlichiida → Redlichiina → Ellipsocephaloidea → Ellipsocephalidae (new classification 2022)

**Provenance** : Morocco; Tasmant

**Formation** : Jbel Wawrmast Fm

**Age** : Early Middle Cambrian

**Details** : Part (internal imprint) of complete specimen. Reminding you (again) that the Ellipsocephaloidea were taken out of Ptychopariida by Pedersen, Geyer et al. (2022). Close-up images done with different lighting angles to better bring out the cephalic features. Also known as *Collyrolenus staminops* Hupe, 1953.

**Bought on** : 15/05/2017

**Bought at** : Comblain-au-Pont

**Event** : Non-fair purchase
