

Neseuretus tristani (TH178h)

Phacopinae → Phacopida → Calymenina → Calymenoidae → Calymenidae → Reedocalymeninae

Provenance : France; "Brittany", La Meignanne

Formation : ? Fm

Age : Ordovician, Llandeilian

Details : Yet another *N. tristani*? Yes...but from a site I didn't have it from yet! Complete enrolled specimen...with some defaults : the pedonclad eyes are not present (see first image on second page)... and secondly, there's exoskeleton (or the internal imprint thereof...because there's actual carapace present, you know!) missing on the right side of the pygidium (see second image on following page). Gift from Didier Walhain.

Bought on : 25/11/2016

Bought at : Comblain-au-Pont

Event : Non-fair purchase & my B-Day
