

Gerastos dhondtae Magrean, 2007 (TH237)

Gerastos → Proetida → Proetina → Proetoidea → Proetidae

Provenance : Belgium; "Olloy-sur-Viroin"

Formation : Jemelle Fm

Age : Middle Devonian, Eifelian

Details : Complete specimen. Originally described as *G. dhondti* [which is a mistake in nomenclature, as it was named in honor of Annie Dhondt, for many years the editor-in-chief of the *Bulletin de l'Institut Royal des Sciences Naturelles de Belgique* (*Sciences de la Terre*), and the suffix therefore had to be –ae, not -i]
