

Pedinopariops ceutonimus van Viersen et al, 2019 (TH271b)

Pedinopariops → Phacopida → Phacopina → Phacopoidea → Phacopidae → Geesopinae

Provenance : France; Vireux-Molhain, “Mur des Douaniers”

Formation : Jemelle Fm, Vieux Moulin Mbr

Age : Devonian (Lower Eifelian)

Details : Enroled specimen, as internal mould, and with slight erosion damage. Addition to the collection thanks to Sébastien Piérard whom gave it to me after I prepped it. Before van Viersen, Taghon & Magrean (2019) restudied multiple specimens of ***Pedinopariops*** from Vireux-Molhain (some with exoskeleton still present) they were automatically identified as ***P. cf. richterianus***.

Gotten on : Early July 2021

Gotten at : Sart-Tilman

Event : June-July prep sessions
