

Brunswickia prantli (Ruzicka, 1944) (TH339)

Brunswickia → Ptychopariida → Ptychopariina → Ptychoparioidea → Ptychopariidae

Provenance : Czechia, Skryje, Dlouhá hora hill

Formation : Buchava Fm, *Eccaparadoxides pusillus* Zone

Age : Cambrian, Drumian

Details : Sold to me as *Jincella* (a persisting junior synonym). Cephalon as part/counterpart moulds (first detail images are for the internal mould; additional images are of disarticulated sklerites). The importance of external moulds becomes evident from the visible surface details.
