

Neseuretus avus (Brongniart, 1817) (TH401a)

Neseuretus → Phacopida → Calymenina → Calymenoidea → Calymenidae

Provenance : Portugal, Canelas

Formation : Valongo Fm

Age : Middle Ordovician

Details : Complete specimen. What with the fauna being compressed, I kinda miss the 3D aspect of the (TH401)-specimen from Spain.
