

Cornuproetus "menzeni" → ***Diademaproetus antatlasius*** Alberti, 1969 (TH84)

Cornuproetus → Proetida → Proetina → Proetoidea → Tropidocoryphidae

Provenance : Morocco; Djebel Issoumour

Formation : ?

Age : Middle Devonian

Details : Stone looks like it might come from "Couche Rouge". Trilobite looks very similar to ***Diademaproetus atlantlasius*** (known from Djebel Oufatene) [***D. menzeni*** Kowalski, 1975 is actually a species from the Eifel region of Germany]
