

Phacopinae fam., gen. & sp. indet. (TH246)

Phacopinae → Phacopida → Phacopina → Phacopoidae → Phacopidae → Phacopinae

Provenance : Morocco; Tinejdad, Jbel Staff

Formation : ? Fm

Age : ?

Details : Complete specimen. This specimen either suffered from erosion, or was dealt with by an impatient prepper (the latter seems likely, considering little effort was made to clean the inter-segmental thorax parts). I found no reference what-so-ever to Jbel Staff, and I have therefore no idea to which time era this specimen belongs. Any help with further identification (also concerning the site) is rather welcome. Sorry for the crappy (old) photography.
