

Anacheirurus adserai (Vela & Corbacho, 2007) (TH306c)

Anacheirurus → Phacopida → Cheirurina → Cheiruroidea → Pilekidae

Provenance : Morocco; "Zagora"

Formation : Fezouata Fm

Age : Lower Ordovician, Upper Tremadocian

Details : Complete specimen, sold to me as a possible new species of ***Lehua***. Its glabella is exceptionally well preserved (and bulbous), but in spite of that I still believe we're dealing with ***Anacheirurus adserai*** here!

Bought on : 06/05/2018

Bought at : Antwerp Expo

Event : Minerant 2018.
