

***Anacheirurus adserai*** (Vela & Corbacho, 2007) (TH206)

***Anacheirurus*** → Phacopida → Cheirurina → Cheiruroidea → Pilekidae

**Provenance** : Morocco; 30 km North-West of Zagora

**Formation** : Lower Fezouata Shales Fm Fm

**Age** : Middle Ordovician

**Details** : Complete specimen (bought as *Lehua* sp.), in association with a small (TH205) *Megistaspis* (***Ekeraspis***) **cf. *filacovi***. Funny detail : the authors described a total of 8 species of ***Lehua*** in the Fezouata Shales of Morocco, of which 2 were later synonymized with ***L. adserai***...which was then transferred to ***Anacheirurus***. Sorry for crappy detail image.

**Bought on** : 21/06/2016

**Bought at** : Sainte-Marie-aux-Mines

**Event** : SMaM 2016
