

## ***Kingaspidoïdes cf. neglectus* (TH140)**

***Kingaspidoïdes*** → Redlichiida → Redlichiina → Ellipsocephaloidea → Ellipsocephalidae

**Provenance** : Morocco; Djebel Ougnat

**Formation** : Jbel Wawrmast Fm

**Age** : Lower Middle Cambrian

**Details** : In 2022, Geyer et al. took the Ellipsocephaloidea from the Ptychopariida (which is a waste bucket for a large number of uncertain families of trilobites), and placed it into Redlichiina. The specimen at hand misses a small part of the left librigenal spine, but on that same side the pleurae could be prepped out a little more.

**Bought on** : 10/05/2015

**Bought at** : Antwerp Expo

**Event** : Minerant 2015
