

“Scutellum mediterraneum” (TH175)

“*Scutellum*” → Corynexochida → Illaenina → Illaenoidea → Styginidae (Scutellidae)

Provenance : Morocco; ?

Formation : ? Fm

Age : Devonian

Details : Complete specimen. To date I still have no further info from the vendor! At any rate, I strongly doubt it belongs to the genus ***Scutellum***. Looking at the specimen with current eyes (and knowledge), I can see small attempts (specifically on the pygidium) to hide the fact that the preservation wasn't perfect.

Bought on : 01/02/2016

Bought at : Leuven

Event : Non-fair purchase
