

***Cyrtometopus* sp.** (TH379)

Cyrtometopus → Phacopida → Cheirurina → Cheiruroidea → Cheirururidae

Provenance : Morocco; Togononin in Oued el Atchaana vicinity

Formation : ? Fm

Age : Lower Devonian, Emsian

Details : Complete specimen. Thought to be a ***Pililetopeltis***, because of the two anterior “spines” on the middle ventral side of the cephalon. However, a slightest bit of sandblasting to improve the quality of the piece showed that those “spines” were actually sculpted (and painted-on).
