

Trochurus speciosus (Beyrich, 1845) (TH370)

Trochurus → Lichida → Lichina → Lichoidea → Lichidae

Provenance : Czech Republic; Svati Jan pod Skalou

Formation : ? Fm (see further)

Age : Silurian

Details : A friend vendor was offered a box of Czech trilobites (mostly bits), and asked me to make an evaluation of the content (some tags had been displaced). In the end, I was offered the box at the little money I had left that day. [According to biolib.cz, the species is found in the Sheinwoodian-Homerian (Silurian) aged Motol Fm] Partial pygidium only, and most certainly from an old collection, as the site is now protected under National Heritage Law.
