

Wenndorfia plana (Koch, 1880) (TH212a)

Wenndorfia → Phacopida → Calymenina → Calymenoidea → Homalonotidae

Provenance : Morocco; Meseta Casablanca Est, Ben Slimane

Formation : ? Fm

Age : Lower Devonian

Details : Complete specimen. Formerly placed into *Parahomalonotus*. Trilobites from the Meseta Casablanca Est all suffered from erosion (limonisation); therefore the exoskeleton is no longer present (as it is in the case of homalonotids from Fom Zguid and Mai'der areas).

Bought on : 20/06/2018

Bought at : Sainte-Marie-aux-Mines

Event : SMaM 2018.
