

?Cornuproetinae **gen. & sp. indet.** → ***Paraaulacopleura sp.*** (TH241)

?Cornuproetinae → Proetida → Proetina → Proetoidea → Proetidae → ?Cornuproetinae

CORRECTION : ***Paraaulacopleura*** → Aulacopleurida → Aulacopleurina → Aulacopleuroidea → Aulacopleuridae

Provenance : Morocco; Hamar Laghdad

Formation : ? Fm

Age : Lower Devonian, Pragian

Details : Complete specimen, with a short story attached. The friend whom sold me this little darling had it in depot for somebody along with another tiny trilobite (TH242), which he thought was the same species. However, that turned out to belong to the subfamily Otarioninae. Sorry for the crappy quality of the images. According to Hervé Toubanc, this may well be a species of "***Paraaulacopleura***".

Bought on : 25/11/2016

Bought at : Comblain-au-Pont

Event : Non-fair purchase (also, my B-Day)
