

“*Kloucekia michelini*” (Rouault, 1851) (TH611)

Kloucekia → Phacopida → Phacopina → Phacopoidea → Acastidae
More likely *Panderia* → Corynexochida → Illaenina → Illaenoidea → Panderiidae

Provenance : France; Mayenne, Andouillé

Formation : Bois d'Arc Fm, Cravat Mbr

Age : Ordovician (Llandeilian)

Details : Complete specimen and most certainly an erroneous identification (*Kloucekia* belonging into the Acastidae)...but at the moment of searching for unfamiliar species names in this old collection, I didn't exactly check on the fossils as well. Call me weird, but to me this looks like a *Panderia beaumonti* (Rouault, 1847), which belongs into the Panderiidae (Illaenoidea, Illaenina, Corynexochida).
