

Placoparia borni Hammann, 1971 (TH532a)

Placoparia → Phacopida → Cheirurina → Cheiruroidea → Pliomeridae

Provenance : Spain; Cuidad Real

Formation : ? Fm

Age : Ordovician

Details : Specimen with most of cephalon possibly still hidden in the matrix (by all means I should try and see whether further prep is possible). Equally visible on the piece are several brachiopods. Addition to the collection thanks to Jesus Garcia Valero.
