

Geesops gallicus Struve 1982 (TH29c)

Geesops → Phacopida → Phacopina → Phacopoidea → Phacopidae → Geesopinae

Provenance : France; Vieux-Moulin, Cite de Maroc, West of Mur des Douaniers

Formation : Jemelle Fm, Vieux-Moulin Mbr

Age : Middle Devonian, Lower Eifelian

Details : Completely exfoliated specimen (internal mould). Used to be known as *Geesops sparcinodus gallicus*. Addition to collection thanks to Sebastien Pierrard. At first, I thought it had a pathology on the left eye.

Bought on : 07/08/2022

Bought at : Liege, Sart Tilman

Event : Gift after prep sessions
