

Odontochile hausmanni (Brongniart, 1822, as *Asaphus*) (TH601a)

Odontochile → Phacopida → Phacopina → Dalmanitoidea → Dalmanitiidae → Odontochilinae

Provenance : Czechia, Prague Basin

Formation : ? Fm

Age : Lower Devonian (Pragian)

Details : Only a pygidium, and as internal mould at that, but the piece was so cute (and the price so fair) that I couldn't resist. Bottom two images were made with different lighting in an effort to get more surface details (I was hoping to make that pygidinal spine a little more visible, actually).
