

Selenopeltis cf. buchii (Barrande, 1846) (TH112a)

Selenopeltis → Odontopleurida → Odontopleurina → Odontopleuroidea → Odontopleuridae → Selenopeltinae

Provenance : Morocco; "Taborikt"

Formation : ?Ktaoua Fm

Age : Upper Ordovician

Details : Complete specimen in association with (TH193) **cf. *Dalmanitina proeva***. As seen on the card that went with the purchase, the vendor didn't really know what he was selling. "Taborikt" may reference to the village of Tabourigt (vicinity of Alnif), and is more likely the place from which the vendor got the specimen (there's a fossils shop there). It is however most likely that the piece was excavated at Bou Nemrou.
