

“Odontochile addii” (TH167)

Odontochile → Phacopida → Phacopina → Dalmanitoidea → Dalmanitidae → Odontochilinae

Provenance : Morocco; Atchana

Formation : Ihandar Fm

Age : Lower Devonian, Pragian

Details : I have not found any dalmanitid species named “addii”, and the specimen certainly does resemble *Zlichovaspis rugosa*, but at the moment I'll keep it under a separate numbering after all.
