

***Ohleum magreani*** Taghon, Bonino & Mottequin, 2012 (TH625)

***Ohleum*** → Lichida → Lichina → Lichoidea → Lichidae → Trochurinae

**Provenance** : Belgium, Couvin area

**Formation** : Jemelle Fm

**Age** : Middle Devonian (Eifelian)

**Details** : Hand-painted 3D copy of the species' holotype specimen, a disarticulated exoskeleton broken in two parts, probably lacking one thoracic segment. If my inside info is correct, only 10 units of the 3D-copy were in existence, and I was lucky enough to be able to lay my hand on one of the last available.

**Gotten on** : 03/09/2023

**Gotten at** : Bibliotheek, Sint-Gillis-Waas

**Event** : BVP 2023
