

Calymene blumenbachi neotuberculata (Schränk, 1970) (TH433)

Calymene → Phacopida → Calymenina → Calymenoidea → Calymenidae → Calymeninae

Provenance : Sweden; Gotland, Sproge

Formation : Hense Mergel

Age : Silurian, Ludlow

Details : Disarticulated molt of enrolled specimen. One of two in a box-set with 4 specimens which were supposed to all be ***Proetus cf. granulatus***. Seems to be a slight damage on the right side of the cephalon.
